

Course Selection Time Line:

February 16th – 19th SPSS Counselors visit gr 9 classes and go over the course selection booklet. Each student receives a booklet, a course selection worksheet and a pamphlet describing the new Math pathways.

(There are 5 empty blocks in the gr10-12 Grad Program. This leaves plenty of space for students to take the Math Prep course and still go on to graduate with their peers in their program of choice. In fact, it may make that dream more attainable.)

February 23 Parent Information Evening at SPSS. 7:00pm in the gym. We begin with an overview to the whole group and then have parents/students come down to the floor. All departments will be represented at tables in the gym to answer parent/student questions. The grade 9s will begin formalizing their course selections the very next day.

February 24th – 25th SPSS counselors will be at CMS working with Grade 9 students to input their course selections for grade 10.

March 1st SPSS counselors will be at CMS to catch any grade 9s who missed the chance the week before.
